

AGN. NO. _____

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

JUNE 25, 2013

There have been recent claims that our Metropolitan Transportation Authority (MTA) bus drivers are becoming ill from the application of pesticides to treat bugs present on MTA buses.

It is in the interest of our bus operators, customers and the public to ensure that the chemicals used to eradicate these insects are assessed by appropriate agencies.

I, THEREFORE, MOVE that the Board of Supervisors:

1. Direct the Agricultural Commissioner/ Weights & Measures Department to conduct an assessment of the MTA's insect control program to ensure that they are operating within industry standards and that the chemicals used do not pose a threat to the health and safety of our bus operators, customers and public; and
2. Report back to the Board in 60 days.
